Carrier PacketPlus™

Carrier411 is launching Carrier511. It's designed exclusively for trucking companies, and there's nothing like it in the industry. You might be asking yourself, what does Carrier511 have to do with carrier onboarding? The answer is everything. Carriers will love it, and so will brokers. Carrier511 provides a valuable service to carriers that they desperately want and need, and it bridges the big data gap between carriers and brokers. Carrier511 is also the foundation for our new Carrier PacketPlus™ carrier onboarding feature within Carrier411.

Carrier PacketPlus™ is designed with better technology than other popular carrier onboarding services, and it will dramatically improve the way you onboard carriers with ease and efficiency. Carrier PacketPlus™ will be integrated in Carrier411 and use our Carrier SelectScore™ artificial intelligence algorithm to ensure the only carriers that get set up with your brokerage meet your hiring standards, which you can configure and adjust.

Carrier PacketPlus™ is designed to reduce risk and eliminate potential fraud that often occurs during the carrier onboarding process. It is built on big data that only Carrier411 can provide. You will even know if the carrier has already made its information available to us in Carrier511, see the majority of that information in Carrier411 before you send an onboarding request, and know if that carrier has been onboarded with other brokers. People in carrier qualification and carrier sales will love it. Carrier PacketPlus™ will be available to use in Carrier411 at absolutely no charge for at least one year. We want to disrupt the industry and take the legs out from other carrier onboarding services, and we're going to do it. We just want to let you know the truth.
