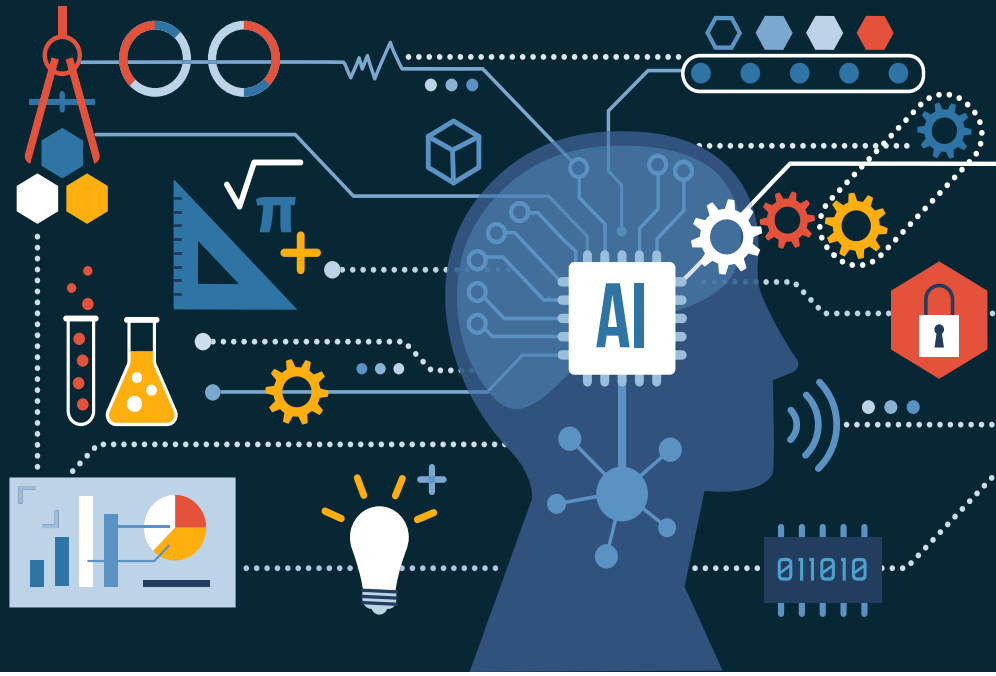
THE NEW WAY TO IMPROVE CARRIER SELECTION



Instantly Speed Up Carrier Qualification and Increase Productivity

Quickly & Easily Identify Reliable Carriers for Specific Shipment Types

Qualify Potential Carriers Consistently With Far Less Risk of Human Error

Carrier SelectScore™

Prepare yourself for our new Carrier SelectScore™ artificial intelligence algorithm. It's a live score that's easy to understand and apply instantly. Scores could change throughout the day and from week to week. It uses a sophisticated statistical analysis model and big data that only Carrier411 can provide.

Carrier SelectScore™ uses thousands of data points from the past and present to measure and predict a carrier's performance and risk levels, particularly for specific shipment types, such as high-value or time-sensitive critical loads. It doesn't replace qualifying carriers, but it makes qualifying them faster, easier and more consistent. At the same time, it also reduces susceptibility to human error and misjudgment. People in carrier qualification and carrier sales will love it.
